Kable HDMI – PureInstall Series

PureInstall HDMI Spring Loaded Cable PI1000 Series

Due to its high reliability, the PureInstall Series High Speed HDMI connection cable PI1000 is particularly suited for professional applications and installations. This series offers excellent value for money, without compromising the quality.

High Speed HDMI for 3D and HDTV resolutions up to 4k (2160p); Integrated Ethernet channel for 100 MBit network transfer via HDMI; High purity tinned plated OFC copper conductor and 3-layer shielding; for optimized transmission quality ;Particularly qualified for professional applications and installations;

24 ct. gold plated precision contacts with PureLink SLS™ (Secure-Lock-System™); Latest HDMI version (for v2.0 with 4K, 3D, HEAC, ARC, Deep Color and x.v.Color™); HDMI-A male to HDMI-A male; PureInstall cable (high purity OFC copper). Triple shielded. AWG28;

Kable HDMI – Ultimate Series

Ultimate HDMI ULS1000 Series

The ULS1000 HDMI cable included in our Ultimate Series with the patented Ultra-Lock-System™ security lock complies with all demands of the new HDMI 2.0 standard and offers an easy to handle security system for all HDMI connections. The ultry-pure, triple shielded OFC copper conductor and the 24-carat gold-plated pins emphasise its ultimate quality. Ethernet channel (HEAC) and audio return channel are of course included.

24 ct. gold plated precision contacts with ULS™ (Ultra Lock System™); Latest HDMI version (for 2.0 with 4K UltraHD, 3D, HEAC, ARC, Deep Color and x.v.Color™); HDMI-A male to HDMI-A male; High Purity OFC Copper. Triple shielded; Polybag Packaging; Patented wave soldering and locking technology.

Kable DVI

PureInstall DVI Dual Link Cable PI4200 Series

Due to its high reliability, the PureInstall Series Dual Link DVI Cable PI4200 is particularly suited for professional applications and installations. This series offers excellent value for money, without compromising the quality. Optimal for the connection of two DVI devices, e.g. connecting a graphics card to an DVI-enabled display with resolutions up to 2560x1600 (QXGA).

High Speed connection for video resolution to QXGA (2560x1600);
High purity tinned plated OFC copper conductor and 3-layer shielding for optimized transmission quality;
Particularly qualified for professional applications and installations;

Kable HDMI / DVI

PureInstall High Speed HDMI DVI Cable PI3000 Series

Due to its high reliability, the PureInstall Series High Speed HDMI to DVI connection cable PI3000 is particularly suited for professional applications and installations. This series offers excellent value for money, without compromising the quality. Optimal for the transmission of video signals, e.g. connecting a graphics card to an HDMI-enabled display.

High Speed connection for video resolution to WUXGA (1920x1200) and FullHD (1920x1080);
High purity tinned plated OFC copper conductor and 3-layer shielding for optimized transmission quality;
Particularly qualified for professional applications and installations.

Kable Display Port / HDMI

PureInstall DisplayPort HDMI Cable PI5100 Series

Due to its high reliability, the PureInstall Series High Speed DisplayPort to HDMI connection cable PI5100 is particularly suited for professional applications and installations. This series offers excellent value for money, without compromising the quality. Optimal for the connection of an DisplayPort device to an HDMI sink device, e.g. connecting a computer to a display.

High Speed connection for video resolution to WUXGA (1920x1200) and FullHD (1920x1080);
High purity tinned plated OFC copper conductor and 3-layer shielding for optimized transmission quality;
Particularly qualified for professional applications and installations.

Kable HDMI 4K światłowód (do 100m)

FiberX Series Active

The AV industry continues to push for greater bandwidth, faster speeds and a lossless signal quality over ever increasing distances. Traditional copper cabling is becoming less reliable or inadequate for these long ranges.

Active HDMI 4K Fiber Optic Extension Cable FiberX Series 4K@30 Hz or FullHD / 1080p

This HDMI AOC cable provides full 4K HDMI signal transmission up to 100 meters. With the "integrated" fiber-optic HDMI cable FX-I330, included in our FiberX series, loss-free and uncompressed transmission for UltraHD / 4K signals is possible in up to 100 meters. The highlight of this cable is the hybrid structure of fiberglass and copper conductors. This is the first available technical solution with full HDCP / EDID / CEC / 5V support. The "integrated" variants also transmit a digital audio signal thanks to the latest chipset. The cables are available in fixed lengths from 10 meters to 100 m.

HDMI via fiber - up to 100m at 4K@30 Hz or FullHD / 1080p; Different pre-assembled cable lengths available: From 10m to 100m; All HDMI data is being transferred (hybrid cable of copper and fiber channels); Supports HDMI and EDID as well as digital audio; AOC Technology - no external power supply needed.

FiberX Series

HDMI 4K Fiber Extender Cable Integrated FiberX Series 4K@60Hz UltraHD / 2160p

The "integrated" glass fiber HDMI cable FX-I340 included in our FiberX Series allows for a lossless and uncompressed transmission of up to 18 GB/s for the first time, making it possible to send content in UltraHD, a resolution of 4K. The maximum reach of this hybrid cable, consisting of glass fiber and copper wire, is 40 meters without any losses. It is the first technological solution with full HDCP support.

HDMI 2.0 / 2.0a via fiber - up to 40m at 4K@60Hz UltraHD / 2160p; Different pre-assembled cable lengths available: From 10m to 40m; HBR2 (High Bit Rate) for higher refresh rates; LED indicator shows the connection status; Supports HDCP and EDID

Przełączniki HDMI

HDMI 1.3 Switcher 4x1 + Audio PS410 - ProSpeed Series

With the PS410 Home Cinema Videoswitcher, PureLink offers the possibility of connecting up to four separate HD-video sources to one HDMI or DVI port of your HDTV and switch between them. Through connecting a coaxial audio cable or an optic audio cable to an audio system, which does not support an HDMI-connection, you can use the digital audio signal from your four sources through the S/PDIF-Digital-Audio output as well. The PS410 also supports HDMI ARC, 3D and CEC. This product guarantees the usual ProSpeed Series' crystal clear, unadulterated sound and sharp high-definition images.

4K, 3D and Audio Return Channel (ARC); ARC digital via Coax and Toslink; 24 ct. gold plated precision contacts and audio output; Incl. power supply and remote.

[Link do strony produktu](#)

671

HDMI Switcher 4x1 PT-SW-HD41 - PureTools Series

The PT-SW-HD41 HDMI switcher included in our PureTools Series allows for quick and simple switching between four HDMI sources for play back on one HDMI display unit. A maximum resolution of FullHD (1920x1080) is possible. The input signal amplification allows for automatic signal level adjustment for different transmission distances. Thanks to its fast switching times and the possible control via RS-232 or remote control, this switcher is the perfect tool for professional and commercial AV installations. Transmission of HDMI incl. 3D, Deep Color and HDTV resolutions up to 1080p (1920x1080); Supports digital and unaltered audio up to 7.1 Channel DTS-HD Master and Dolby TrueHD; Supports HDCP 1.2.

[Link do strony produktu](#)

825

VGA Switch 4x1 PT-SW-VGA41 - PureTools Series

With the PT-SW-VGA41 VGA switcher included in the PureTools Series a quick and simple switch between four different VGA sources for one screen is possible. Alongside the video signal with a resolution of WUXGA (1600x1200), an analog stereo audio signal can also be transmitted. An integrated signal amplifier guarantees for perfect signal level adjustment for transmission distances of up to 65 meters. The device can be used as plug-and-play solution without any additional configurations or programming and is a perfect solution for professional video installations.

FullHD VGA resolutions up to 1080p (1920x1080) and WUXGA (1920x1200); Supports stereo audio via 3,5mm jack; Integrated signal amplifier incl. automatic signal level adjustment; RS-232 as well as IR connector for external control / switching.

Luxi Switcher LU-THB-350 - HDMI, DP & VGA

World's smallest high performance all-format, all-purpose, HDCP compliant signal converter, scaler, switcher, splitter as well as audio mixer, embedder and de-embedder including high efficiency fanless design, rack and under-table mounting options.

- Supports following input signals: VGA + 3,5mm Stereo Audio, HDMI and DisplayPort;
- Mirrored Output: HDMI and/or HDBaseT for the same picture on two displays;
- HDBaseT transmits A/V, RS-232 and PoC to an HBaseT receiver (not included);
- Integrated scaling function for different signal formats and resolutions;
- "Show Me" control button** for fast and easy presentation;
- Individual, external "Show Me" connectors**:
 - 3,5mm stereo audio output for a separate audio extractions;
 - RS-232 connector for external control;
 - Slim construction for a space saving installation;
 - Auto Switch function including active signal input detection;

[Link do strony produktu](#)

2641

Luxi Switcher LU-SHD-310SM - HDMI, DP & VGA

The LU-SHD-310SM Presentation Switcher by Luxi Electronics with integrated scaler distributes a HDMI, DisplayPort or VGA including audio signal to up to two HDMI outputs with analog audio coupling. The active input signal is being scaled into a compatible output signal, so no format adjustments have to be made. Furthermore, the Presentation Switcher is equipped with detachable "Show Me" buttons, an LED status notification and a RS-232 port for external control. This all makes it perfect for the use in conference rooms, home cinema systems and Digital Signage applications.

- Supports VGA +3,5 mm Stereo Audio, HDMI and DisplayPort;
- Scaling function for different signal formats and resolutions;
- Auto Switch function incl. active input detection;
- RS232 port for external control as well as 3,5mm stereo audio extraction;

Przełączniki prezentacyjne

Presentation Switcher 4x2 incl. Scaler and PoH - PT-PSW-42

The 4x2 multiformat presentation switcher is designed for the signal distribution of different signal inputs to two mirrored HDMI and HDBaseT outputs. It is perfect for professional installations and provides many innovative functions and control options for professional media integration in conference rooms, collaboration environments, lecture rooms, etc.

- Output resolutions up to 2160p / UltraHD / 4K;
- Inputs: HDMI, DP, VGA, Mic and Line level audio;
- Outputs: HDMI and HDBaseT;
- Maximum transmission distance: 70m for 1080p / 40m for 4K or UHD;
- Built-In Scaler for perfect format adjustment;
- 1 piece HDBaseT receiver included in delivery.

[Link do strony produktu](#)

6716

Presentation Switcher 5x2 incl. Scaler and PoH - PT-PSW-52

The PT-PSW-52 is a compact presentation switcher with 5 video inputs (1x HDMI / MHL, 2x HDMI, 1x DisplayPort and 1x VGA) and 3 different audio input options via 3.5mm jack on the DP connection, 3.5mm Jack on the VGA connector or unbalanced / balanced MIC audio via Phoenix screw terminals. The Presentation Switcher scales the input signal and then directs it simultaneously to the HDMI and HDBaseT outputs.

- Output resolutions up to 1080p (1920x1080 / 1920x1200);
- Inputs: 3x HDMI, 1x VGA, 1x DP;
- Outputs: 1x HDMI, 1x HDBaseT, 1x Audio;
- Switchable 48V phantom power on the MIC input for condenser microphones;
- Front Panel, Web GUI, RS-232 Port and IR for external control;
- Auto-Switching function for input signals / Online Software Upgrades.

Dystrybutory (rozdzielacze) HDMI

HDMI 4K Splitter 1x8 - PT-SP-HD18-4K

The PT-SP-HD18-4K HDMI 1x8 splitter included in the PureTools Series is a HDMI splitter with one input and eight outputs which distributes one 4K HDMI input signal to up to eight output devices. Thanks to its integrated output signal amplifier to adjust to differing distances, the RS-232 port for software updates and the automatic EDID learning function, a lot of technological features are being offered to make it useful as a plug-and-play solution with professional cascading applications. The HDMI signal is being transmitted digitally and uncompressed to the output devices with a resolution of up to 4K2K.

Inputs: 1x HDMI, 1x USB;
 Outputs: 8x HDMI;
 Power: 5V4A DC;
 Control connector: USB (Firmware);
 Digital video formats: 2160p@30Hz, 1080p@60Hz, 1080p3D@30Hz;
 Digital audio formats: HD Surround Sound (Dolby TrueHD, DTS HD) oder Ster;
 Supported standards: HDMI, WE/SS 8P8C, HDMI Deep Color & Full 3D, 4K.

Bezprzewodowa transmisja HDMI

The Cinema Series from PureLink sets an example with sophisticated and future-proof technology when it comes to digital adaptation! It excels through the greatest possible flexibility and caters to all the latest specifications.

The name of the Cinema Series is not without reason - we guarantee for a HDTV cinematic experience compliant with HDMI 2.0 specifications for resolutions up to 4K / UltraHD / 2160p, while maintaining the usual features of for example gold-plated plugs for a reliable adaptation

The haptics of the adapters have been given a usability overhaul, giving you a perfect handling experience. The Cinema Series from PureLink does not compromise when it comes to image, optics and fabrication for multimedia applications!

HDMI Wireless Extender CSW100 – Cinema Series

Wireless HD Transmitter & Receiver Set, 30m
Transmission distance: 30m in line of sight;
Wireless HD using 5G frequency for 3D and HDTV up to 1080p@60Hz;
Wireless AV data transfer for HDMI connections;
Incl. digital audio;
Transmitter including extra HDMI-A breakout port for 2 monitors on one source;
Barely noticeable latency;
Hidden antenna in 5GHz band;
Small housing for a space-saving and inconspicuous installation;

PureID Wallplate Series

PureLink's PureID Wallplate Series offers an ideal integration of media technology through modular wall plate transmitters which can individually be equipped with HDMI, VGA, network and other data and audio/video interfaces.

The mountings' and connection panels' special design provides a perfect look and is ideal for ambitious audiovisual installations.

PureID ID-WP-COVER – Blank wallplate module

The ID-WP-COVER blanking blind gives a clean finish to the PureID wall plates. Slots from the mounting frames which have not been used are therefore protected and optically improved. If a slot needs to be used at some point, the blanking plate can be easily removed and replaced by a wall plate included in the ID-WP-MOD Series due to its functional click-fit mechanism. This offers the greatest possible flexibility for the installation.

PureID ID-WP-FRAME-1 - Wallplate frame 2 slot

The ID-WP-FRAME-1 mounting frame included in our PureID Series allows for two wall plates included in the ID-WP-MOD Series to be installed into the wall. The functional click-fit mechanism the modules are easily fit into the frame. The mounting frame is compatible with all standard flush-mounted boxes from German manufacturers and therefore easy to install. Its high-grade metal surface additionally gives this frame a noble appearance.

120

PureID ID-WP-FRAME-2 - Wallplate frame 5 slot

The ID-WP-FRAME-2 mounting frame included in the PureID Series with a noble metal surface offers space for five individual wall plates. All kinds of media can be connected to the system from one location in the room. From HDMI to audio- and video-ports to a network connection, single plates included in the ID-WP-MOD Series can be easily installed like a building kit due to the click-fit function. The mounting frame is compatible with all standard flush-mounted boxes from different manufacturers and therefore easy to install.

PureID ID-WP-MOD-AU - Volume control tuner wallplate

The ID-WP-MOD-AU included in our PureID Series makes it possible for ID-WP wall mounting frame owners to integrate a stereo amplifier to permanently installed cables - just with one click. It does not only provide a perfect transmission of the stereo-audio signal via a L/R audio-cinch port, but also offers regulation of volume due to an integrated volume-control unit. The back side of the plate provides spring clips for the installation cables.

72

PureID ID-WP-MOD-ET - RJ45 wallplate

With the ID-WP-MOD-ET wall plate included in the PureID Series perfect conditions for an optimal transmission of digital signals via Ethernet is provided. The wall plate includes two RJ45 sockets each on the front and on the back for Ethernet data transmission. It can easily be integrated via click-fit mechanism in either the two-fold or five-fold mounting frame included in the ID-WP Series.

86

PureID ID-WP-MOD-HD - HDMI wallplate

The ID-WP-MOD-HD HDMI wall plate included in our PureID Series offers a perfect transmission of a digital HDTV signal. It is designed to fit the mounting frames included in the ID-WP Series. The integrated 0.25m cable whip with HDMI socket simplifies plugging in external, permanently installed HDMI cables due to the angled HDMI plug on the back side. It fits even the smallest installation conditions and relieves the socket.

PureID ID-WP-MOD-RB - Component wallplate

Our PureID Wall Plate Series allows for the perfect integration of modern and classic technology with modular wall plates like the ID-WP-MOD-RB Wall Plate Component. The plate provides three Cinch-ports (Y+Pb+Pr) and therefore allows for the best transmission of a component-video-signal via component-Cinch. The integration into the wall mounting frames included in our ID-WP Series works via click-fit mechanism. On the back side, spring clips are provided for the RGB cables.

72

PureID ID-WP-MOD-RC - C-Video + Audio wallplate

The ID-WP-MOD-RC wall plate included in PureLink's PureID Wallplate Series offers classic transmission of audio and video via Cinch port. It offers a C-video port (yellow) for transmitting an analogue video signal and a matching stereo-Cinch audio port with two sockets (red and white) for transmitting audio files. On the back side, spring clips are integrated matching the ports. Like all PureID wall plates, it can easily be clicked into both wall mounting frames included in the ID-WP Series.

[Link do strony produktu](#)

72

PureID ID-WP-MOD-VG - VGA + Audio wallplate

The ID-WP-MOD-VG wall plate, like all plate included in the PureID Series, was developed to equip the mounting frames from our ID-WP Series. This product allows for a space-saving and easy transmission of video and audio signals. The plate provides a VGA port to be connected to a screen, as well as a 3.5mm audio-socket for transmission of the associated audio signal. The back side of the ports come with spring clips for the installation cables.

[Link do strony produktu](#)

105

PureID ID-WP-MOD-XL - Audio XLR + RJ11 wallplate

The ID-WP-MOD-XL wall plate included in our PureID Series is a plate with two different ports: a XLR socket to connect a microphone on the one hand and a RJ11 port on the other. On the back side, spring clips are provided for each to allow for mounting of the wall cables. The plate was developed to equip the mounting frames included in our ID-WP Series, where it takes up two sockets because of its width. Like all PureLink wall plates, the ID-WP-MOD-XL guarantees a perfect transmission of the signals.

67

PureID ID-WP-MOD-USA - USB-B wallplate

The ID-WP-MOD-USA USB-B wall plate included in the PureID Series has been developed especially to equip the two-fold or five-fold mounting frame included in the ID-WP Series to ensure a perfect transmission of a digital USB-signal. The wall plate provides a small USB-B input port on the front and a USB-A port on the back for older installed USB cables, therefore allowing an easy connection from source to sink.
