

# THE NEW DIMENSION IN LIGHTING EXPERIENCE

amBX delivers new intelligent lighting control for lighting and AV professionals allowing the freedom to create new levels of experience.

From large scale architectural installations through to bars, clubs, shops, restaurants, sensory, cinema and home entertainment amBX touches the senses to create a unique ambience and experience.

- // Full ambient and mood lighting control
- // Dynamic and unique video and audio to light effects
- // Simple setup without the need for programming
- // Perfectly compatible with leading automation and control systems

“This cutting edge technology delivers an exciting and immersive experience.”

**Charles Boyd**

Director of 8 Northumberland Avenue, London

# INTELLIGENT LIGHTING SOLUTIONS FOR AV PROJECTS

Transform any space, event or project with the power to control everything from subtle ambience to dynamic immersive lighting at the touch of a button.

- // No programming required to achieve stunning lighting effects
- // Cost effective and simple, rapid set up
- // Dramatically enhances the effect of any video or presentation
- // Extensive range of ready-to-go lightscaapes including ambient, audio or video to light effects

**Harness the power of amBX for your project with:**

- // Custom lightscape design
- // Multiple DMX universes
- // Multi-zone lighting effects
- // Full integration with Crestron, AMX and Control4

**Use the amBIENT XC controller for projects up to 1 DMX universe**

- // 2 U rack mount controller
- // DMX 512
- // RS232 connectivity
- // 24 x 7 scheduler
- // Installer tool software
